

Antique Alder Collection

The rustic charm of a true heritage floor

Our *Antique Alder Hardwood Collection* displays a wonderfully textured grain pattern with splendid intergrown knots. Increasingly recognized as one of the premier hardwoods used in rustic applications, red alder readily conveys the warm comfortable feeling of a true heritage floor.

Red alder, the beautiful West Coast hardwood is used exclusively in the *Antique Alder Collection*. These hardy, fast-growing trees are considered to be a renewable resource and assist in regenerating soil for future forest growth. All of our lumber is carefully processed from responsibly managed groves, allowing homeowners to enjoy their choice of flooring even more. A unique antiquing process of hand distressing, pillowing and staining lends a true historic patina to these pre-finished solid planks.

Chateau Plank (3/4")	2' - 8' (avg. >65")	call to custom order	8"	call to custom order

Engineered Composition *3-layer solid-sawn*

Top Layer: **Solid Red Alder Hardwood Wear Layer**

Standard Engineered: 3.2mm, Chateau Plank: 4.5mm

- Thick solid-sawn veneer allows for multiple re-sandings
- True solid plank look with engineered stability
- Highest-quality zero formaldehyde adhesive used for gluing components together

Middle Layer: **Solid Alder Cross-Laminated Fillets**

Standard Engineered: 10mm, Chateau Plank: 13mm

- Superior rigidity prevents cupping and width shrinkage
- Nail down strength identical to solid wood flooring

Bottom Layer: **Solid Alder Balancing Layer**

Standard Engineered: 3.2mm, Chateau Plank: 4.5mm

- Same thickness as wear layer for ultimate stability
- Improved performance for glue-down applications

Solid Plank

This pre-finished hardwood is as authentic and historic as it gets! Our 3½" to 6" planks will provide the look and longevity that you expect from wood flooring. With a very thick, top-quality and re-finishable polyurethane coating, floor will improve in character over time.

Engineered Plank

This plank is made to look exactly like our solid wood flooring. By engineering a wear layer of solid wood over solid-sawn backer (*page 1 bottom*), we create even more stable flooring which can be used in floating, radiant heat and below grade installations. The ultimate choice for truly historic looking flooring with the added benefit of modern engineering stability.

Chateau Plank

The ultimate choice for a grandiose design statement, our *Chateau Plank* is the widest plank available in pre-finished alder. Larger knots accentuate the wide planks, and our skilled craftsmen carefully retain the longest lengths possible. Starting at 3' and going to 8' means an average plank length of 75", which is double the length of most pre-finished flooring! This engineered hardwood is milled precisely the same as our solid flooring, allowing the two styles to be used together to achieve the most dramatic random-width look on the market.

Finishing

Epoxy filled knots and precise milling with end-matching on all boards. Refined timeworn hand-sculpting and an air-dried, scratch-resistant polyurethane, 20° satin gloss finish.

Accessories

Creative At Home uses the exact matching wood, stains and finish to make our moulding and trim. This allows us to guarantee total satisfaction when you use our accessory products to complete your project.

In Stock: Stair Nosing (4 ½' & 6 ½'), Reducer (8'), T-moulding (8'), Vents, ¼ Round
Custom Order: Stair Treads, Mantels, Mouldings, Baseboards

Installation

Solid: Not suitable for use over radiant heat. Nail down, full glue spread, or staple down.

Engineered: Nail down, full glue spread, staple down, floating, and over radiant heat are all acceptable.

Chateau Plank: Not suitable for use over radiant heat. Nail down with glue strips or full glue spread.

Please see the *Details* page of our website for information on installation and adhesives.
